SOCCERGROUND® Advanced

Areas of Application

The SoccerGround® Advanced is our free-standing stationary system. Just as sturdy as the SoccerGround® Classic (the original DFB mini-pitch) and built for many years of outdoor use, it is ideal for:

- Schools, sports schools and boarding schools
- Soccer clubs, sports clubs and soccer associations
- Club hotels expanding their sports offering
- Companies with employee sports programs
- Shopping centers, leisure parks, outdoor pools
- Parks and playgrounds
- Social institutions for children, young people, people with disabilities, mother-and-child homes, etc.

Site Requirements

The SoccerGround® Advanced requires NO ground anchoring.

No foundations, grooves or other recesses are needed: the system simply stands on top of the ground. The only requirement is a level surface with a stable subgrade.

This saves you the effort and cost of socket foundations.

In many cases, the SoccerGround® Advanced is therefore the perfect alternative to an anchored system, especially if the ground must not be altered, the pitch is to be relocated at a later date, or building foundations would be costly.

SOCCERGROUND® Advanced

Technical Details

- The stationary SoccerGround® Advanced requires NO foundations, just a level surface with good load-bearing capacity
- No holes are made in the ground
- If required, the pitch can even be moved to a new location after a few years
- The complete, ready-to-play system consists of surrounding boards, goals and ball-stop nets behind both goals
- Unlike the SoccerGround® Classic, the Advanced is fitted with an additional, structurally certified steel handrail along the long sides
- This handrail and frame construction gives the system rigidity and stability, so the boards cannot bend or tip over
- The extra weight of the steel handrail and the anti-slip system under the posts ensure maximum stability
- Hot-dip galvanizing makes all steel components weatherproof and corrosion-resistant for the long term
- The boards are 1 m high and made of double-walled, metal-coated sandwich panels with a special sound-absorbing foam core for optimal noise reduction
- In line with the DFB standard, we supply the boards in green. Many other RAL colors are also available (boards and nets)
- The goals, including goal nets, are integrated into the steel structure and allow access for artificial turf maintenance vehicles
- High-quality ball-stop nets behind both goals, 3 m high including boards (higher nets available), keep the ball from flying over the target. With a mesh size of approx. 5 x 5 cm and a thickness of 4 mm, children cannot climb them and they won't cut into fingers
- The nets are evenly tensioned by stainless steel tensioning systems and neatly threaded onto a round tube directly at the edge of the boards
- Add side and roof nets to keep the ball on the pitch even during the wildest games
- Players enter the pitch through doors in the goals, which are TÜV-approved as emergency exits
- An entrance door can be integrated into the boards on request
- Also available as a multi-sport court
- No finger traps, no sharp edges and no protruding corners
- TÜV GS-tested as a complete system and compliant with DIN 15312 (freely accessible multi-sport equipment), so the pitch does not require constant supervision

SOCCERGROUND®

Advanced

Pitch & Goal Sizes

As with the Classic system, the size of the SoccerGround® Advanced can be chosen freely, depending on the available space, the target group (children, teenagers or adults) and the number of players (smaller or larger groups).

Several mini-pitches can of course be combined, so that games can run side by side, board to board.

Popular pitch sizes:

- 15 x 10 m with 3 x 2 m goals
Ideal for children, teenagers and small teams of approx. 3 vs. 3
- 20 x 13 m with 3 x 2 m goals
Ideal for children, teenagers and small teams of approx. 5 vs. 5
- 30 x 15 m with 3 x 2 m goals
Ideal for teenagers, adults and medium-sized teams of approx. 6 vs. 6
- 40 x 20 m with 5 x 2 m goals
Ideal for adults, pros and larger teams of approx. 8 vs. 8

Optional Extras

- **High-quality surface**
for the ultimate playing experience and better training results; depending on your needs, e.g. a professional artificial turf system with shock-absorbing layer, or a tartan surface for a multi-sport court
- **Protective side nets**
in various heights (standard 3 m incl. boards, 4 m or 5 m safety nets)
- **Roof nets**
for complete protection against lost balls
- **Sponsor branding**
for commercial use as part of sponsorship activities, ideal for refinancing
- **Integrated floodlights**
turn your pitch into a complete stadium, keep it playable late into the evening and, for commercial use, make it more profitable
- **Multi-sport modules**
add basketball, volleyball, hockey, badminton, soccer tennis and much more to soccer
- **Stands**
for events with spectators
