SoccerGround® with anti-vandal mesh, Schwedt, 20 x 13 m

SOCCERGROUND® with Anti-Vandal Mesh

The Ultra-Robust Sports Facility

Thanks to its sturdy steel frame construction, the board system of our stationary SoccerGround® Classic is already exceptionally well protected against damage.

For public spaces that are regularly exposed to vandalism, the Classic pitch can be upgraded to make it even more resistant to deliberate damage.

The SoccerGround® with anti-vandal mesh does without nets. Instead, it features a high-strength twin-wire mesh ball stop that makes the court virtually indestructible.

Holes in nets are a thing of the past, and with a ball stop running all the way around, the facility can also be secured against unauthorized access.

SoccerGROUND® with Anti-Vandal Mesh

Applications

Our anti-vandal sports court is designed primarily for public spaces, as it is extremely solid, durable and low-maintenance. We recommend the SoccerGround® with anti-vandal mesh for, e.g.:

- Municipalities
- Schools, sports schools and boarding schools
- Sports clubs and associations
- Companies with staff sports programs
- Leisure parks and outdoor pools
- Parks and playgrounds
- Social institutions for at-risk youth
- (Youth) correctional facilities

Site and Installation Requirements

The SoccerGround® with anti-vandal mesh is based on our stationary Classic board system, combined with a twin-wire mesh ball stop instead of nets.

The pitch is completed with artificial turf or a synthetic surface. Multi-sport modules such as basketball and volleyball can of course also be installed.

The board system is anchored in the ground using socket foundations.

The exact dimensions of the area required for the pitch can be found in the corresponding site and foundation plan (depending on pitch size and equipment).

We offer a full-service package including professional installation by our team.

If you plan to install the pitch yourself, please note that this should be done by a technically skilled team. In this case, follow our installation instructions and secure the construction site against unauthorized access to prevent injuries from parts that have not yet been assembled.

SOCCERGROUND® with Anti-Vandal Mesh

The Board System

- Ready-to-play basic equipment: surrounding boards, two 3 x 2 m goals, twin-wire mesh ball stop behind the goals (3 m incl. boards)
- TÜV GS-tested as a complete system in accordance with DIN 15312 (freely accessible multi-sport equipment), i.e. completely safe, so the pitch does not require constant supervision
- Steel frame construction, hot-dip galvanized (immersion bath, highest quality class), corrosion-resistant, permanently weatherproof and therefore much more robust than comparable systems made of, e.g., aluminum
- Steel goals, fully welded, integrated into the overall structure
- Access to the pitch: through doors in the goals, which are TÜV-approved as emergency exits
- Ball stop: twin-wire mesh, standard height 3 m incl. boards, mesh size approx. 50 x 200 mm, wire gauge 8/6/8
- Boards: 1 m high, made of double-walled, metal-coated sandwich panels with a special sound-absorbing foam core
- Board colors: green on both sides, gray, other (RAL) colors on request
- No finger traps, sharp edges or protruding corners

Add-Ons

- Add-on: twin-wire mesh ball stop along the long sides (for a ball stop all the way around)

Background Information

- Overall dimensions of the largest part: back of goal (one half): 1713 x 1140 x 2086 mm (W x L x H)
- Weight of the heaviest part: back of goal (one half): approx. 101 kg

Pitch & Goal Sizes

The SoccerGround® with anti-vandal mesh is available in various sizes, depending on the available space, the target group (children, teenagers or adults) and the sport.

Popular pitch sizes:

- 15 x 10 m
- 20 x 13 m
- 30 x 15 m
- 40 x 20 m
