SoccerGROUND®

Indoor

Areas of Application

The SoccerGround® Indoor was developed for halls and facilities such as:

- Professional sports halls
- Indoor soccer centers
- Former tennis halls being converted
- Indoor spaces, e.g. shopping centers, trade fairs
- Hotels (e.g. sports hotels, club hotels)
- Leisure parks and indoor playgrounds

Site Requirements

The SoccerGround® Indoor can be set up in any hall that offers enough ceiling height for professional soccer and a level floor (e.g. asphalt, concrete, hard court, artificial turf, wooden floor, carpet, sand, etc.).

Ideally, the board system can be screwed or anchored to the floor.

If this is not possible because the floor must not be damaged or the pitch is to be moved to another location later on, we also offer a suitable solution for that.

Installation is usually carried out by the SoccerGround® installation team, which also takes care of special requirements (anchoring in concrete floors, attaching nets to ceilings and walls, etc.).

Indoor

Technical Details

- The SoccerGround® Indoor is a ready-to-play system consisting of boards, goals and ball-stop nets behind the goals
- Ideally, the board system is screwed to the bare concrete floor via flat base plates on the outside of the pitch, which are then covered by the final floor covering (e.g. carpet, see pictures on the right)
- Installation without anchoring is also possible; we will be happy to advise you on the right pitch system for your hall
- The profiles are made of steel (e.g. board connectors) and corrosion- and impact-resistant aluminum (e.g. handrail and goal) for lasting stability and an attractive look
- Players enter the pitch through 2 doors at each goal end; a door can also be built into the boards on request
- High-quality ball-stop nets behind both goals (4 m incl. boards or higher) keep the ball in play
- Indoor courts are usually completed with side nets for a ball stop all the way around (especially recommended in halls with several pitches)
- In professional sports halls, side/divider nets at least 4 m high and, if needed, roof nets are recommended; these are either anchored to the system or suspended from the ceiling with tension cables
- The boards
 - are double-walled with a special foam core, making them particularly high-quality and sound-insulated
 - are 1 m high; the length depends on the court size (usually approx. 5 m)
 - offer plenty of space on the inside and outside for your sponsor advertising (long-lasting direct print or interchangeable vinyl graphics)
 - come in SoccerGround® green as standard, but can be supplied in other RAL colors on request, as can the nets

Pitch & Goal Sizes

Like all our pitch systems, the SoccerGround® Indoor can be sized to fit your hall.

Depending on the available space, you can have several small pitches for children and smaller teams, or large pitches for teenagers, adults and larger teams.

On request, the dividing boards between two pitches can be made removable, so that several pitches can be turned into one large one.

Popular pitch sizes:

- 30 x 15 m
Ideal for teenagers and adults, and teams of e.g. 5 + 5 players
- 20 x 13 m (DFB standard)
Ideal for teenagers, adults and smaller teams of 3 + 3 to 5 + 5 players
- Any other size, adapted to your hall or facility
- Goal sizes to suit your needs:
e.g. 4 x 2 m / 3 x 2 m / 1.8 x 1.2 m

Optional Extras

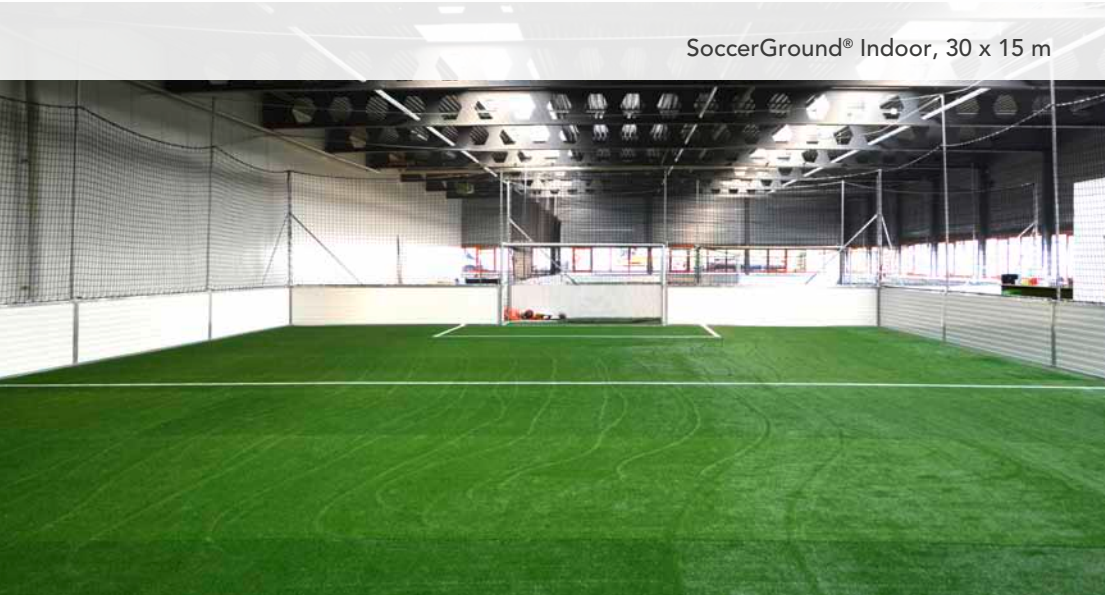

- **Sports artificial turf**
for professional soccer conditions; filled or unfilled, for maximum, joint-friendly playing comfort
- **Protective side nets**
usually with roof net, at least 4 m high incl. boards, or higher
- **Board advertising**
permanent, UV-resistant sponsor prints, either direct print or interchangeable vinyl graphics (gloss or matte)
- **Sports lighting**
with eco-friendly LED technology for optimal lighting of your hall
- **Multi-sport modules**
e.g. basketball, volleyball or badminton
- **Stands**
for a better view and more comfort for spectators
